Tubing Cutters

SSI™ TC-20 Tubing Cutter

The SSI Model TC-20 electric stainless steel tube cutter assures a zero dead volume connection. Because the tubing is held securely in a clamp vise on the vertical swing arm, a square cut is produced when the swing arm is lowered against the abrasive cutting wheel, which produces a finished end. No lubricant or cutting fluid is required. The unit, which is CE marked, will cut most common tubing used in chromatography. Tubing with 1/16 in., 1/8 in., and ½ in. outside diameter, can be smooth-cut and dressed without distortion.

The precision ground dressing tool for the $\frac{1}{16}$ in. O.D. tubing is included and is attached directly to the swing arm: it cannot be misplaced or lost. A dressing tool (deburring tool - Cat. No. 58804) for 1/8 in. diameter can be ordered separately.

PEEK Tubing Cutter

Makes burr-free, perpendicular cuts through polymer tubing with outside diameters from $\frac{1}{16}$ in. to $\frac{1}{8}$ in.. Designed for cutting PEEK tubing, but also easily slices through PTFE and Tefzel capillary tubing. Compact design includes a safety locking mechanism. One spare blade included.
