

Gas Purification/Management

Purifiers: *Base Plate Purifier Systems*

Base Plate Purifier Systems

With this design, the purifiers connect into a base plate in such a manner that gas supply is not interrupted during purifier change-out. Therefore, the purifier can be replaced without shutting down the entire system. Additionally, the risk of forcing a 'slug' of air into the instrument after purifier change-out is eliminated.

Super Clean (Base-Plate Design) Kit

Super Clean™ base-plate purifiers are a unique point-of use glass/metal, diffusion proof purification system to purify carrier, fuel, and other gases for the GC or GC-MS system. These purifiers remove hydrocarbons, oxygen (color indicated), and moisture (color indicated) to better than 6.0 gas (99.9999%) quality at 2 L/min., independent of the original gas quality.
